Strong, stable and flexible bale wrapper.

Wrapping while extra bale is transported in the lifting fork.

Gentle bale handling. Turntable is lowered to the ground before bale roll off.

Big tyres: Reduced ground pressure. Counterweights integrated in main frame.

Hydraulic film holder and film cutter .

The designers at TKS have many years experience in grass handling equipment, especially bale wrappers. A brand new wrapper with many innovations is now being introduced to the market by the original bale wrapper company. The TKS 6150 is a strong, stable, flexible wrapper which is easy to operate in all conditions. The machine is very user friendly. Due to it's unique strong frame + turntable, the wrapper can handle bales up to 1400 Kgs. when extra counter weights are fitted. Maximum bale diameter is 1600mm. The TKS 6150 has been designed to transport one bale in the lifting fork whilst wrapping another. Standard counter weights are integrated in the main frame, but additional weights can be fitted to the wheel axle and frame to handle even the heaviest bales. The tipping frame has also a unique design: The tipping point is in the front, the turntable therefore can be lowered right to the ground, before the bale rolls gently off. This eliminates

the need for a drop damper. The hydraulic film cut and tie system is activated automatically. Three alternative wheel sizes are available, the largest being, 480/45-17" providing good floatation and reduced ground pressure under all conditions. A film roll holder for up to 7 extra rolls, mounted on the drawbar and the frame, can be supplied as an option. Film break sensor and road lights are also offered as options.

Specifications

Length incl.drawbar	3.71 m.
Width, depending on wheel sizes	2.51 - 2.92 m.
Height, with lifting fork up:	2.40 m.
Weight with standard counter weights:	1.505 kg
Weight including all counter weights:	1.825 kg
Oil requirement:	26 l/min (150bar)
Bale diameter :	1,0 – 1,6 m.
Bale length :	1,2 m.
Max bale weight :	1400 kg

Wheel sizes :

300/80-15.3
400/60-15.5
480/45-17
