Underhaug UN3760 series

6- and 8-row potato planters

TKS is proud to introduce its latest range of cup potato planters for the professional growers world wide.

For decades Underhaug planters have been known for their accuracy, high performance, durability, and are highly appreciated among the operators. Compared to earlier, Underhaug models the UN3760 offers many new and unique features.

The UN3760 range of planters are operated and controlled by hydraulics and electronics, and offers immediate seed spacing setting from the tractor cab, and indefinite adjustment of fertiliser volume during planting.

Even though the UN3760 machines resemble former Underhaug planters, the UN3760 represents a completely new design, but still based on the facts we know from many years of experience.

The well-proven Underhaug planting unit can now offer

View of the UN3760 in operation

considerably higher planting speed without interfering with the accurate seed placing. Low power requirement is another feature with all Underhaug machines, they pull easily under all conditions, and combined with the easy-to-use computer, and few moving parts, potato planting is now easier and quicker than ever before. With a 6 ton potato bunker and 2,2 ton fertiliser tank, down time for re-filling is reduced to a minimum, and with a constant speed of 6,5 m/h and 36" row distance the 6-row version will nominally plant 118 acres in a 10 hour day, depending on seed space.

UN3760 being quickly re-filled

Technical Specifications UN3760:

Length:	20' (6000mm)(min.)
Width (at 36"):	20' 4" (6100mm)
Height:	6' 4" (1900mm) (min.)
Weight:	9350lbs – 12430lbs (4,2t-5,6t)
Standard wheel size:	12,4"x24"
Standard shoes:	HD w/shock absorbers
Seed spacings:	4" – 24"
Potato hopper capacity:	13200lbs (6t)
Fertiliser tank capacity:	5940lbs (2,7t)
Oil requirement:	12gal/min at 2610psi (35ltr/min at 180bar)

Planting cups (steel) with 2 cup insert sizes (plastic)

Options:

Automatic planting depth control
Fertiliser machine (stainless steel belt feeding)
Coulters for placing fertiliser
Floating planting shoes
Various tire sizes
Hydraulic marker arms
End tow kit for road transport

The UN3700 series includes 2-,4-,6- and 8-row potato planters
